

AMAZON VALLEY IS ATTRACTING WORLD

INDUSTRIAL GENIUSES OF THE
WORLD TURNING TO THIS
GREAT WONDER SPOT
FOR NEW OUTLET.

By the Associated Press

PARA, (Mouth of Amazon River), Dec. 2.—The industrial development of the Amazon Valley is attracting the attention of European countries. British, German, Italian, Norwegian, Swedish and Dutch capitalists, engineers and importers are making investigations of the mineral and forest resources of the valley or have obtained concessions to establish industries here. So far American participation in this development work is conspicuous by its absence.

English engineers are up river at the present time investigating the possibilities of vegetable oils; English experts are here studying the practicability of extracting starch and industrial alcohol from the root of mandioca, an English engineer has returned to this city from Iquitos for further equipment with which to extend the examination he is making in the mineral area of the Peruvian Amazon on behalf of a British syndicate.

The Italian syndicate which has been operating a small experimental vegetable oil factory at the town of Cameta, on the Tocantins River, about 100 miles from Para, has applied for a concession to open a large factory in Para for the extraction of illuminating and edible oils from the nuts of the palms and trees which abound in the forests. A similar concession has been given to a group of local capitalists for the establishment of oil factories in certain municipalities throughout the state.

Concessions have been granted recently by the State Congress for various factories to manufacture glass, hammocks and thread, salt and its products, paper of all grades, rubber goods, vegetable dyes and ink and butters from vegetable ivory nut. These so-called "concessions" are not to be confounded with the exclusive monopolies so popular in other Latin American countries which in the past have proved to be a hamper instead of an aid to industrial development. In Brazil a "concession" to establish a factory or industry is more in the nature of a "charter," with, in some cases, special tax exemptions for a number of years, or privileges in the matter of import duties on machinery and equipment.

The Alsatian Plantations Co., a German syndicate, has reopened its plantation near Para, which was abandoned when Brazil entered the war on the side of the Allies. This company has 200,000 banana trees and 100,000 abacaxis (pine apples) under cultivation. Bananas thrive exceptionally well in this region; they are subject to none of the diseases prevalent in other banana growing countries, and owing to the extraordinarily even climate of Para require little attention when growing. The Para and Amazon bananas are said to be the best Brazil produces, and are in great demand in Rio and Buenos Aires; they are said to stand shipment unusually well.

Norwegians are operating a large saw mill on the Ilha das Onças, an island in the Guajara River opposite to the city of Para. Although there are immense forests full of woods of many varieties, some of them of (Continued on Page Eight.)

GERMANY WON'T SIGN PROTOCOL

SOME SAY IT IS BECAUSE THE
UNITED STATES SENATE
FAILED TO RATIFY
THE TREATY.

By the Associated Press

PARIS, Dec. 3.—Germany has decided not to sign the protocol presented to her by the allies as a condition for putting the peace treaty into effect, the peace conference has been notified. It was learned today that Lersner, head of the German delegation, informed the conference on Monday that Germany had made such a decision.

This attitude is taken as confirming the report of sharp reaction in Germany within the past fortnight. Trained observers of German developments has expressed the view that there has been a complete transformation of the situation in Germany and that it is due to the failure of the United States Senate to ratify the peace treaty.

The question upon which the German representatives appear most secretive is the allied insistence upon the trial of German officers accused of crimes in France and Belgium.

Thus far it is stated no indications have reached Paris of any disposition on the part of the Germans to modify their attitude.

SENATE ORDERS INVESTIGATION

NEWBERRY-FORD CONTROVERSY
COME UP IN THE SENATE
AND AN INVESTIGATION
ORDERED.

By the Associated Press

WASHINGTON, Dec. 3.—Investigation of the Newberry-Ford Senatorial controversy from Michigan was authorized today by the senate in a resolution presented by Senator Pomerene, Democrat of Ohio.

Investigation by grand jury of the election of Truman H. Newberry to the United States senate was ordered by the Department of Justice and was based. It was announced on filed complaints and "public charges of fraud and corruption" made by the lieutenant governor of Michigan and others. United States District Judge Sessions presided over the inquiry, which was conducted by Frank C. Dailey and H. Hale Souther, special assistants to United States Attorney General Palmer.

Witnesses were summoned from every part of the state and represented both political parties. They numbered into the hundreds and included both men and women. Chase S. Osborn former governor of Michigan and one of the Republican candidates defeated for the nomination by Mr. Newberry in the primary election, with the first witness summoned.

Government officials asserted that the testimony presented to the grand jury had revealed a political scandal that in many respects was without parallel in American annals. They said it extended from the most popular wards of Detroit to the Indian Reservations on the shores of Lake Superior where aborigines were voted according to the behest of the Newberry campaign organization.

WILSON'S RAILROAD MESSAGE DEFERRED

By the Associated Press

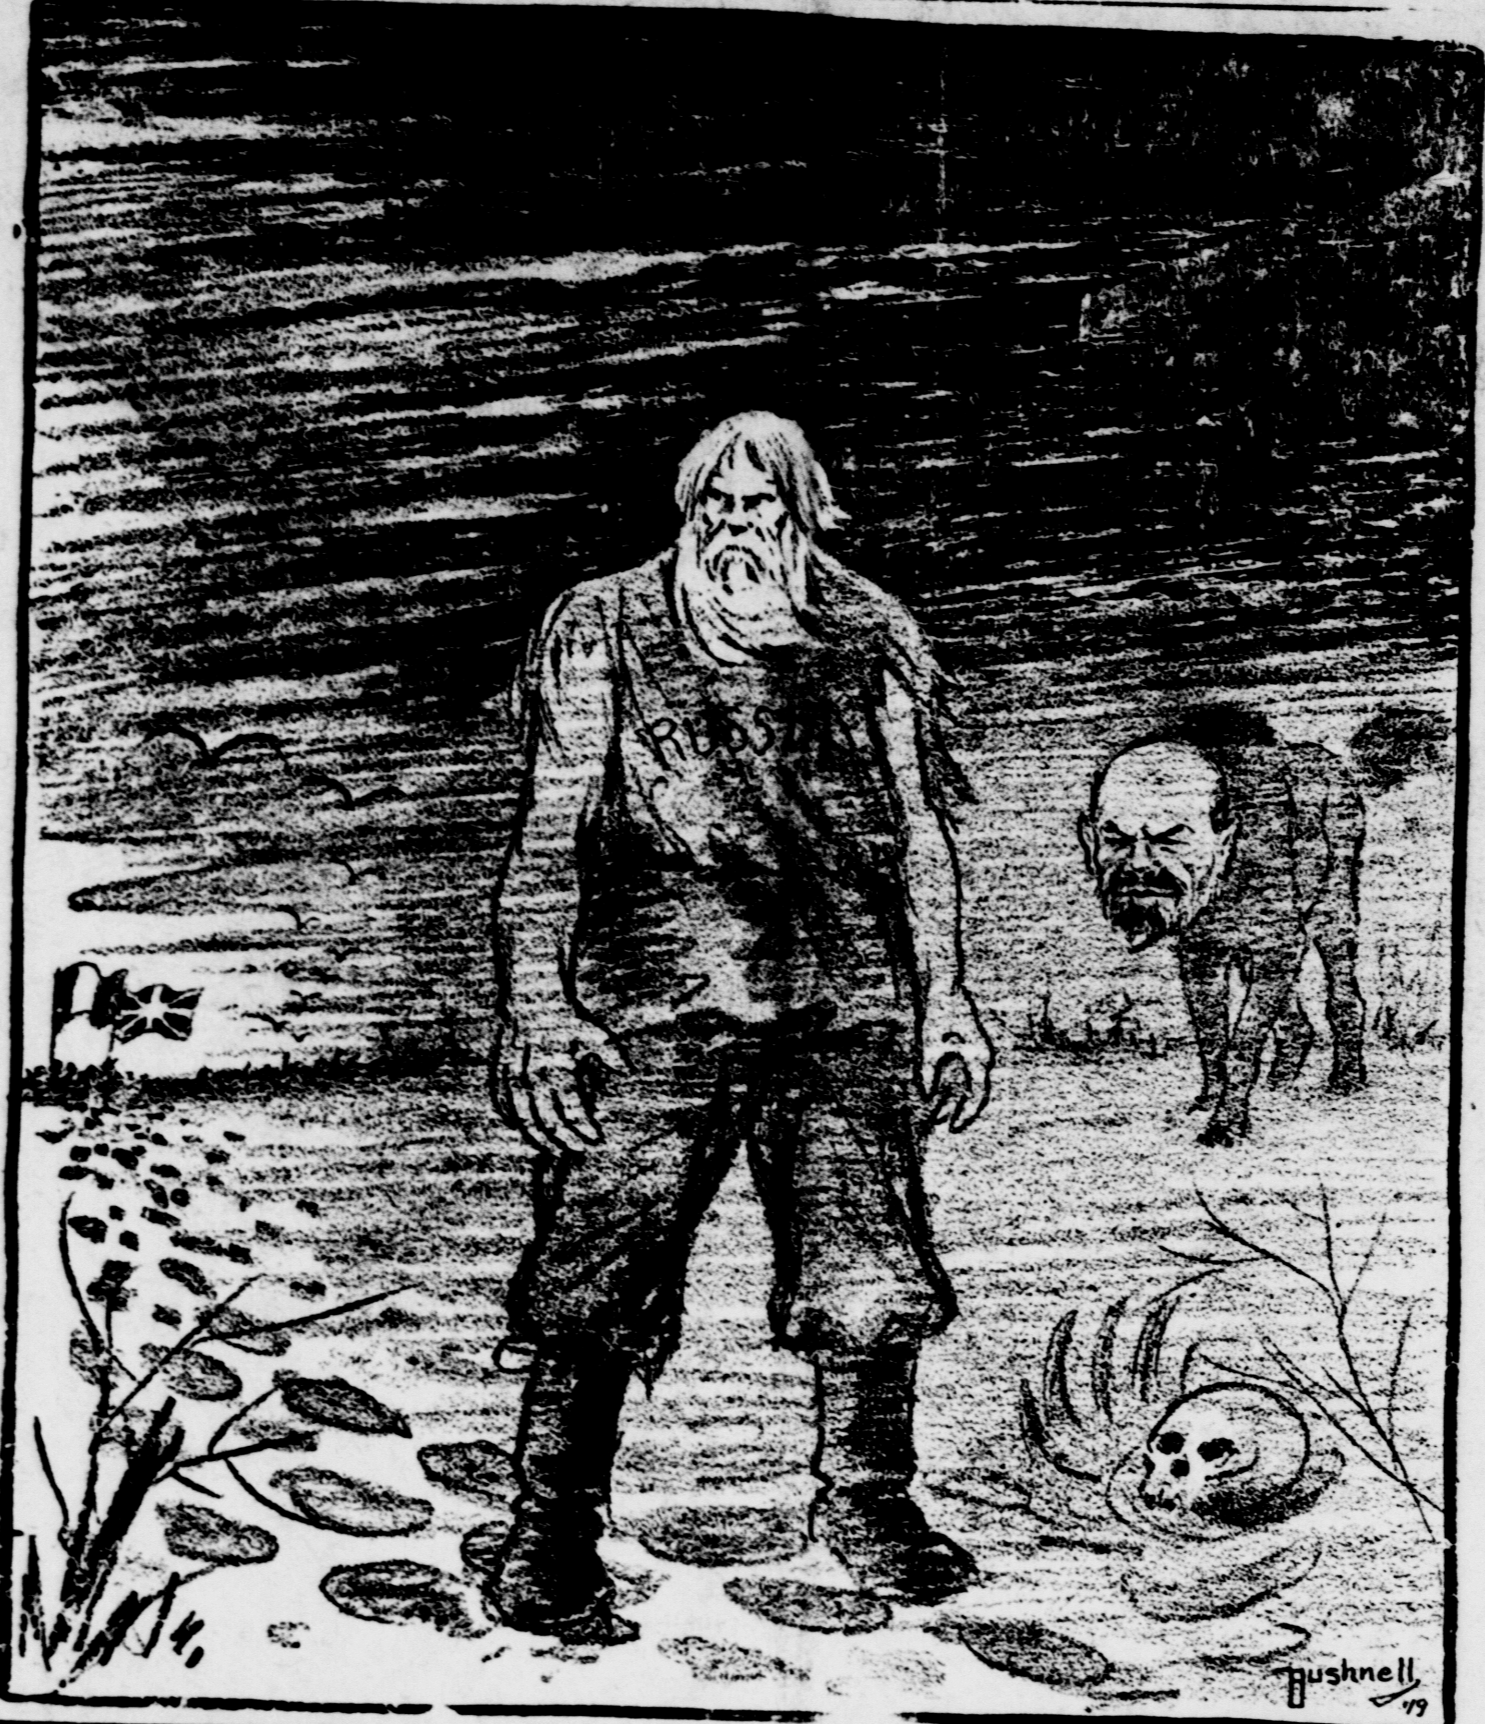

WASHINGTON, Dec. 3.—President Wilson will not begin preparation of his special message to congress on the railroad situation until Director General Hines has conferred with Senator Cummings and Representative Esch, chairmen of the senate and house interstate commerce committees, on the pending railroad bill. It was said today at the White House.

It was intimated that the status of the legislation might be such that the President would not regard it as necessary to address congress on the subject. Congressional leaders are determined to press the bills but they have expressed doubt that their enactment could be completed before Christmas.

Some officials and railroad men are of the personal opinion that the President will wait action on the pending legislation. Those at the White House refuse, however, to comment.

Let a Want Ad get it for you.

LEFT TO WORK OUT HIS OWN SALVATION

BANDIT CARLISLE SHOT; CAPTURED

IN DOUGLAS COUNTY, WYOMING.
HOSPITAL WITH BULLET
WOUND IN CHEST, EX-
PECTED TO DIE

By the Associated Press

DOUGLAS, Wyoming, Dec. 3.—Two score years or more of prison life and possibly death in the electric chair, confronted William Carlisle as he lay in the Douglas hospital today with a bullet hole in his right chest, while armed guards hovered in the back grounds to prevent escape.

Carlisle was shot down in a cabin yesterday by Sheriff Roach of Wheatland as the bandit, cornered, reached for an automatic pistol to give battle. The posse had trailed Carlisle since Sunday morning thru a blizzard with teams and on horse back, and finally on foot when drifts of snow were encountered, too large for horses to negotiate. The outlaw who had eluded capture since his escape from the state penitentiary at Rollins, November 15, and the subsequent robbery of the Los Angeles Limited near Medicine Bow, November 18, was strapped to the back of a horse for the descent down Larmi Peak, eighteen miles southwest of here, and was then bundled into an automobile and rushed to this city.

Just what disposition will be made of him has not been determined. Carlisle has been in Wyoming since the train robbery.

CARRANZA TO HANDLE
THINGS WITH UNCLE SAM

MEXICO CITY, Dec. 2.—The solution of difficulties arising out of international affairs with the United States were entrusted entirely to President Carranza without legislative intrusion by the senate at a secret session here today. Relations with the United States were described during the session as "very delicate."

GERMANY WILL SIGN
UNDER CONDITIONS

PARIS, Dec. 3.—Germany is willing to sign the protocol putting the peace treaty into effect the moment certain clauses objectionable to her are eliminated. Lersner, head of the German delegation here, told the Associated Press this afternoon.

REFUSE TO HANDLE
VOLUNTEER PRODUCT

PITTSBURG, Kan., Dec. 3.—Railroad trainmen at Frontenac have refused to handle cars containing coal mined by the state's volunteer miners.

British to Build A Jewish Home in Ancient Palestine

By the Associated Press

LONDON, Dec. 3.—Two years ago the British government issued a declaration of policy in favor of the establishment of a Jewish national home in Palestine, and a Zionist meeting has just been held to celebrate the anniversary. Baron Rothschild presided and read a letter from Lord Curzon, the Foreign Minister, giving assurance that there had been no change in the government's policy.

Lord Rothschild said that they were much nearer their goal than before, and he felt sure that they would yet see the establishment of their desired home, because it was the will of an overwhelming number of their Jewish brethren and was also the desire of the rest of the world.

The meeting adopted a resolution, moved by Herbert Samuel, member of Parliament, re-affirming "the unshakable will of the Jewish people to reestablish their national home in Palestine."

The number of motor trucks has increased in ten years from 4,000 to nearly 500,000.

HEAR SCOTT FERRIS AT COURT HOUSE

DEMOCRATIC CANDIDATE FOR
UNITED STATES SENATE TO
ADDRESS ADA VOTERS
TONIGHT.

Hon. Scott Ferris of Lawton will speak in the district court room in Ada this evening in the interest of his candidacy for the democratic nomination for United States senator from Oklahoma. Everyone is cordially invited to hear Mr. Ferris, who is Oklahoma's best known congressman. The speaking will begin promptly at 8 o'clock.

Mr. Ferris arrived in Ada at noon today over the Frisco from Tishomingo, where he had been working in the interest of his candidacy. He is spending the afternoon going about town meeting his numerous friends.

SENATE ORDERS MOST
SWEEPING INVESTIGATION

WASHINGTON, Dec. 3.—A general investigation of the federal trade commission was ordered by the senate today, besides an inquiry into the charges of Senator Watson, republican, of Indiana, who charged that the commission was a hotbed of Socialism and Bolshevism. The committee will take up the commission's attitude toward business interests, and toward all business agencies in general.

SECOND REPORT ON
SEVENTY FIVE MILLION

Tonight at the First Baptist Church at 7 o'clock we will hear the latest report of the team workers in the Baptist Seventy Five Million Campaign.

The teams have been at work since Sunday and several more subscriptions have been made. We will hear the final report Sunday night at the services.

Let's have a large attendance at prayer meeting tonight.—C. C. Morris, Pastor.

Masons Elect Officers.

At its regular meeting Monday night Ada Lodge No. 119, A. F. & A. M., elected and installed the following officers: R. H. Gladwill, W. M.; F. R. Laird, S. W.; Chas. Deaver, J. W.; B. M. Bobbitt, Treasurer; F. C. Sims, Sec.; W. P. Lee, S. D.; Frank Arnett, J. D.; A. M. Russell, S. S.; E. C. Peay, J. S.

Mrs. W. L. Reed, formerly a resident of Ada, returned to her home in Ardmore yesterday after a week's visit with relatives and friends in the city.

Miss Nettie Frizzell of Roff, who has been visiting Miss Bess Laird, left for her home yesterday.

OFFICIALS MARK TIME ON MEXICO

ANXIETY PREVAILS AS CABINET
MEMBERS AWAIT DELIVERY
OF NOTE TO MEXICAN
GOVERNMENT.

By the Associated Press

WASHINGTON, Dec. 3.—State department officials were marking time today awaiting word from Mexico City of the latest American note to the Mexican government and the subsequent action inspired by it. The message was garbled in transmission and this delayed its presentation to President Carranza.

In some quarters it was believed that Carranza would order the release of Jenkins soon after receiving the message and prevent a complete break between his government and the United States. Private advices from Mexico indicated that some of the Mexican officials were not taking the negotiations seriously and felt that it involved only an interchange of diplomatic notes. A different attitude was evident at the state department, however, where the situation was being gravely considered, and should Carranza continue to hold out against the government's request pressure was expected to be brought which would force Mexico to accede to the demands.

COAL SHORTAGE MORE ALARMING

INDUSTRIES CONTINUE TO SHUT
DOWN AND REGIONAL DI-
RECTORS ANNUL MORE
PASSENGER TRAINS

By the Associated Press

CHICAGO, Dec. 3.—Further disruption of national industry because of the fuel shortage brought about by the strike of bituminous coal miners was in prospect today. Regional directors of railroads had authority to annul passenger trains where the public would be least inconvenienced and many additional manufacturing plants throughout the country were facing shutdowns either through the exhaustion of their coal supplies or the strict rationing decreed by the federal fuel administrator.

State executives who, under appeals for aid from their constituents had sought ways and means for replenishing the fuel supplies were without encouragement today as regards increased production.

Generally the workers obstinately adhere to their attitude of remaining away from the mines until better terms than the 14 per cent wage increase decreed by the government were forthcoming.

A slight ray of hope, however, was found in optimistic reports from the operators of the district embracing southeastern Kentucky, Tennessee and Virginia that the backbone of the strike there had been broken; the return to work of the miners at one small mine in Missouri with the statement that they as Americans could not see their neighbors suffer; and the adoption by the miners of one West Virginia sub-district of a resolution favoring a general return to work under the 14 per cent increase plan until a satisfactory adjustment is made.

OPERATION RESUMED IN KANSAS FIELDS

By the Associated Press

PITTSBURG, Kan., Dec. 3.—Eleven strip pits in the Kansas coal fields will be in operation by the state this afternoon, Governor Henry J. Allen announced this morning just before starting on a tour of the district north of Pittsburg.

C. D. Sample, one of the state's receivers, announces that eight or ten cars of coal would be shipped out of the coal fields tonight. The first car load went from Pittsburg late yesterday to Coldwater, Kans.

Whether members of the four brotherhoods of railroad employes working out of the coal fields will refuse to handle the coal was to be determined at a meeting late this afternoon. The railway employes expected word today from their national organization on their request that they be permitted to refuse to handle the state mined coal.

M. O. Belmont formerly of Ada, returned to his home in Bonham, Texas, yesterday morning after visiting old friends in the city for the past few days.

ELECTRIC POWER FOR PALESTINE

NORWEGIAN ENGINEER DEVISES
PLAN TO PROVIDE WATER
AND POWER FOR AN-
CIENT PROVINCE.

By the Associated Press

CHRISTIANA, Dec. 3.—A Norwegian engineer has devised a plan to provide water and electric power for Palestine at an initial cost of \$40,000,000. Albert Hjorth of this city proposes to utilize the variation of the level between the Mediterranean and the Dead Sea and by means of a tunnel for water, to provide electric power to be used for pumping stations, irrigation and general purposes.

Mr. Hjorth proposes to dig a tunnel 37 miles long, from the Mediterranean to the Dead Sea, passing under Jerusalem. This tunnel would carry water from the Mediterranean to the western slopes of the lower end of the Jordan Valley. Thence the water would pass through pipes down to the Dead Sea where a power plant would transform the water power into electricity, to be distributed as light and power through the country. This power would be used to drive a pumping station at the southern end of the Sea of Galilee (Lake Genesaret).

The surface of the Dead Sea is about 1,300 feet below sea level; that of the Sea of Galilee 650 feet below sea level.

Preliminary estimates, Mr. Hjorth states, show that tens of thousands of horsepower might be developed in this way by means of a tunnel carrying 20 tons of water per second. He estimates the rise of the Dead Sea caused by this at not more than a part of a yard per year. The surface of the sea which is now about 4,000 square miles, would be allowed to increase to about 4,800 square miles.

Two canals would be built running parallel with the river Jordan and from these canals water could be distributed among the fields sloping toward the Jordan sufficient, it is claimed, for the irrigation of many hundreds of thousands of acres.

Mr. Hjorth claims it would be no more difficult to build this tunnel than the proposed railway tunnel under the English Channel, and estimates that the cost of the Dead Sea tunnel (double) with a minimum area of 135 square feet at \$40,000,000, to which must be added the cost of the power plants, factories, canals and irrigation works. It is pointed out that the estimated cost involved in this plan does not compare unfavorably with the irrigation works constructed in Asia and America during the past decade. Mr. Hjorth's plans have met with great sympathy a mong leading scientific authorities and practical engineers in Norway. It is proposed to send out a Norwegian technical scientific expedition which, with the anticipated support of the governments of the great powers interested will proceed to Palestine and make a years' thorough investigation of all the conditions relative to the realization of this project—topographical, hydrological, technical, geological, hygienic, etc.

If the matter reaches such a stage that the realization of this great project can be seriously contemplated, the resources of Norway will not suffice alone, but the aid of international capital will be invited.

GERMANS WANT TO TRADE POTASH FOR AMERICAN COAL

By the Associated Press

BERLIN, Dec. 3.—The German Potash Syndicate is negotiating with America again, says the NORTH GERMAN GAZETTE which believes it will be able to reach an agreement in regard to the exchange of potash for American coal.

Negotiations took place between the Germans and Americans last spring but failed, says the paper, because America still thought it could rely on its own substitute for potash and refused the German offers, whereupon Germany sold her output, which was intended for the United States, to Sweden.

Negotiations, says the Berlin paper, have now been resumed to enable the German potash mines, of which 120 are crippled through lack of coal while others have only 25 percent enough fuel to buy American coal with dollars and recoup by selling potash to America at dollar rates.

Other negotiations are also underway between Germany and Holland for milk and dairy products in exchange for potash.

MEXICAN DEPUTIES WOULD
RESTORE BULL FIGHTING

MEXICO CITY, Dec. 2.—By an overwhelming vote the Mexican chamber of Deputies today passed a bill restoring bull fights. The senate will vote on the measure tomorrow.

ARMISTICE DAY IN LONDON

Premier Lloyd George placing wreath on cenotaph in London Armistice day

Armistice day was observed with fitting ceremonies in London. A proclamation was issued by King George, requesting all industry and pleasure to stop for one minute at eleven o'clock on the day, and uncover in respect to the glorious dead. Premier Lloyd George's part in the ceremonies of the day was to place a wreath at the foot of the cenotaph in London.

GIRDLE FLIERS
USE NEW MAP

AVIATORS IN THE PROPOSED 1920 DERBY WILL TRAVEL BY NEW BUTTERFLY MAP, THEY SAY.

By the Associated Press

SAN FRANCISCO, Calif., Dec. 3.—Flyers in the proposed 1920 world-girdling air derby will not travel by Mercator's projection but by a new "butterfly" map devised by B. J. S. Cahill, of Oakland, Calif., which has just been adopted by Major Charles I. Glidden, executive secretary of the Aerial Derby Commission, now on his way to the Far East, and who gave the map his approval before leaving here.

Mr. Cahill, who is the originator of San Francisco's \$12,000,000 "civic center" plan, said that an aviator using the Mercator projection as a guide, would go 1,000 miles out of his way in a trip from Panama to Yokohama. "If the North Pole were on an island a mile wide," he said, "it would appear on Mercator's projection to be 25,000 miles wide, or nearly the total circumference of the earth at the equator."

The inventor of the new map, who worked on his drawings fifteen years, said that "an impartial and rational world geography is essential to world peace." He said that Mercator's projection, which was originally devised by the Belgian cartographer as a guide for navigators, "distorted and exaggerated the earth as it receded from the equator." This, for instance, made it appear as if South America were much smaller than North America, when, as a matter of fact, he said, they were about the same area.

The Cahill map is as though an actual sphere had been cut and flattened, its appearance somewhat

resembling the outspread wings of a butterfly.

A nation looking unduly expanded on the map may easily, Mr. Cahill says, develop a sort of geographical "big headedness," inducing an overbearing diplomacy. A nation whose territory is so unduly exaggerated on the maps in common use may well come to exaggerate its resources, economic strength and even its virtues, and so create an atmosphere anything but conducive to mutual good will and consequent world peace.

All problems of intercommunication by sea, land or air are baffling, and misleading on Mercator's chart, says Mr. Cahill, but simple and obvious on the "butterfly" map, a further aid to mutual knowledge and understanding.

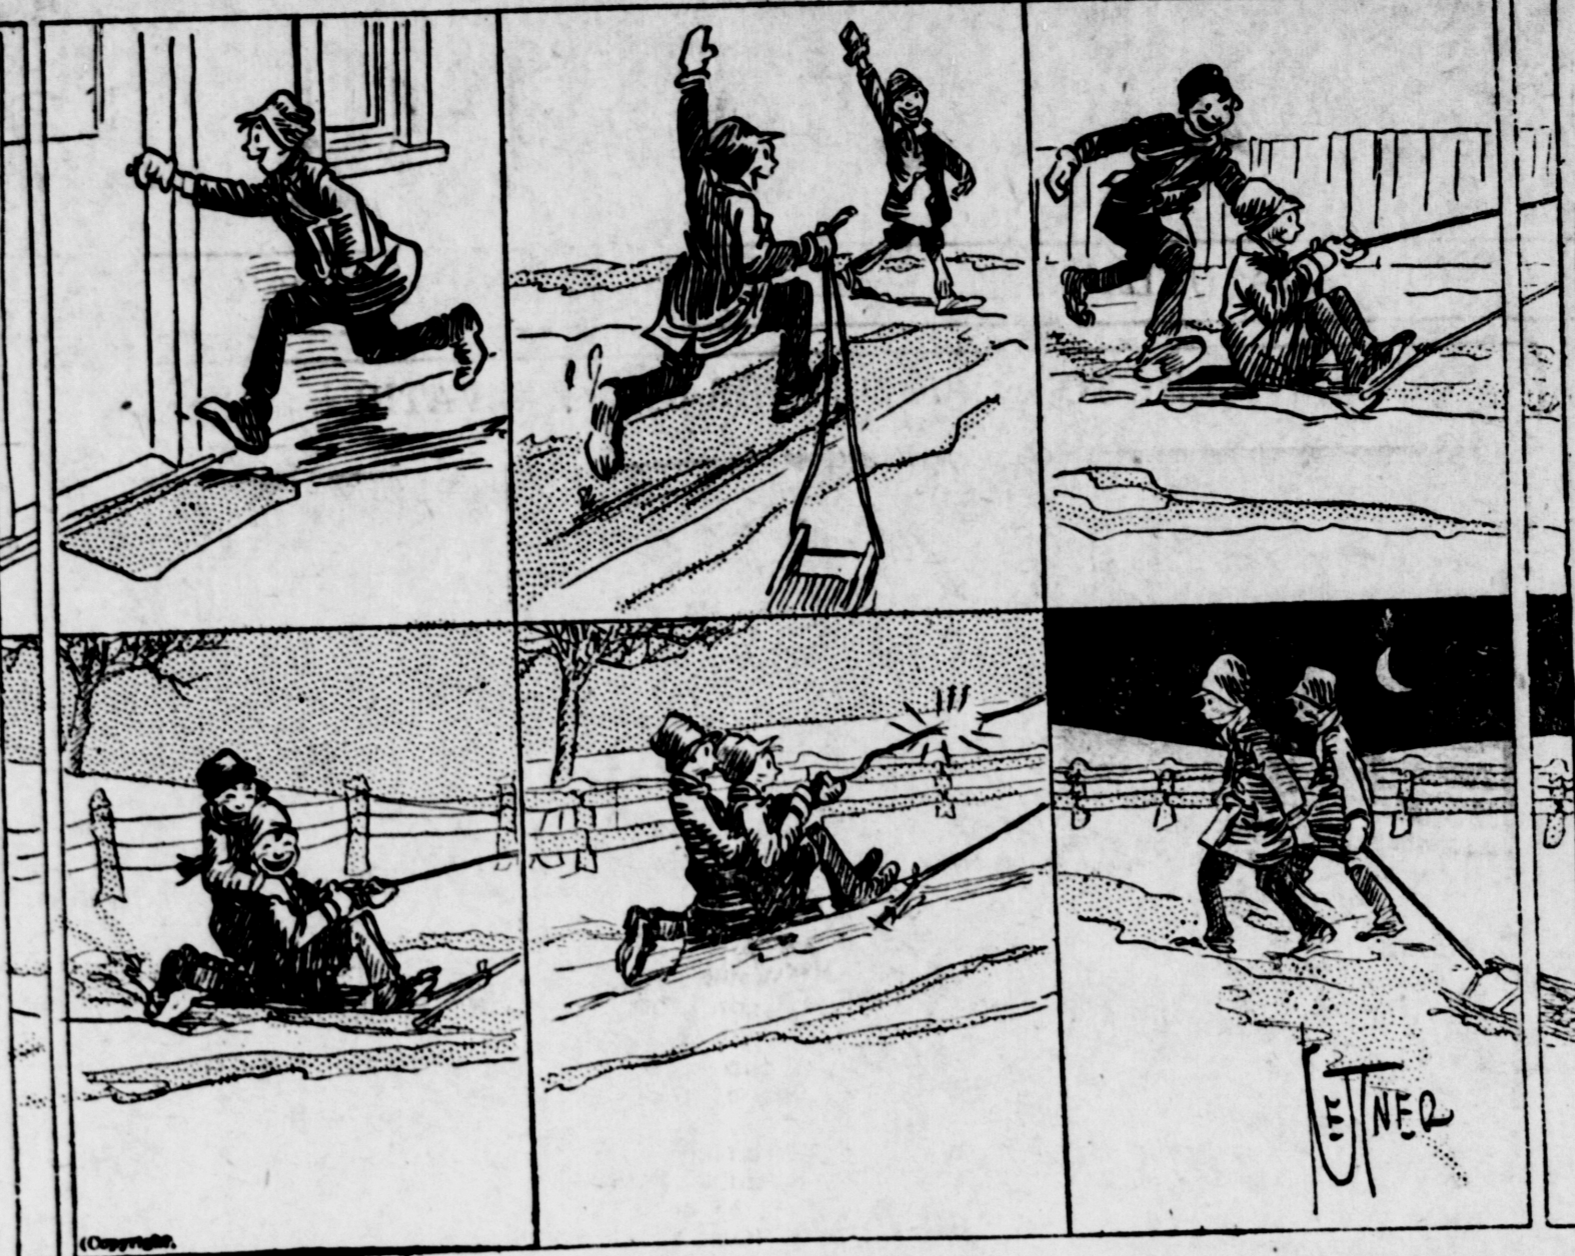

"Internationalism, now a sporadic and occasional thing, but destined in the future to be the keynote of all human endeavor, plays an important part in the science of statistics and meteorology," said Mr. Cahill. "Graphical statistics are self-contradictory and ludicrous on Mercator's chart and as for indicating the progress of high and low pressure rings in weather charts, the ever changing scale on Mercator's was simply bewildering to the forecaster who had to use them. The new map, by showing all lands in their true proportion and form, he declares, would help materially in solving peacefully problems dealing with the world as a whole."

PRAYER MEETING AT CHRISTIAN CHURCH

As much of the prayer meeting hour as will be necessary will be devoted to preparing the Every Member Canvasses for their work next Sunday afternoon. Other members of the church should be present, especially the elders, to help in this preparation. Brethren, let us all pray that these twenty-five or thirty men may be thoroughly prepared for the work the church has called them to do. C. V. DUNN, Minister.

a foot or more in length on vegetation on Mount Washington.

The End of a Perfect Day

URGENT CALL FOR RELIEF FUND MADE

OKLAHOMA CITY, Dec. 3.—Urgent calls from the near east are being made for cash with which to buy food and clothing for the millions in Armenia and Syria who are facing immediate starvation according to F. L. Carpenter, state secretary for the Near East campaign committee.

Hundreds of women and children face starvation, Mr. Carpenter says. Weakened by the indignities suffered at the hands of the Turks and a meager food supply for the past two years more than 500,000 children are near death.

Women are selling on the slave block in Turkey for as low as 85 cents each. The suffering of the women is even more horrible than that of the children. Forebly taken to the harems of the Turks they are enduring tortures worse than death.

"American womanhood is aroused," Mr. Carpenter said yesterday. "Already many women's organizations are demanding that something be done for the relief of these sufferers. American m. a. are going to back them in their demands."

"While organization for their relief is being perfected we must do something. A Christmas letter is being sent out. It is carrying an appeal to prosperous America for a small fund to keep these unfortun-

ates alive until spring. By next fall we hope to have organized relief work until suffering will be entirely wiped out. I am looking to the generous people of Oklahoma for heavy support."

Who Are the Men

Who are behind this campaign for the relief of our brothers in the Near East? There is a committee of fifty-two prominent men, some of whom have a national reputation. There is ex-president Taft, Hon. Charles Evans Hughes, Hon. Ellihu Root, Hon. Henry Morgenthau, Hon. Oscar S. Strauss, Cleveland H. Dodge, Charles W. Eliot, ex-president of Harvard university, Herbert Hoover, Frederick Lynch, Editor of "The Christian Work", John R. Mott, and so on. These names ought to give the people confidence in the campaign. On the state committee are Perry E. Pierce, state director; William O. Buck, treasurer Central National Bank, Tulsa; I. F. Roach, D. D. Oklahoma City; Ex-Gov. R. L. Williams, Muskogee; C. H. Nichols, State Sunday School Sec., Anton H. Classen, and others. Our county treasurer is J. A. Smith, of the Guaranty State Bank of Ada. Surely all these are sufficient to insure confidence. Citizens of Pontotoc County, how can we afford to shut up our compassion and refuse help to these wretched sufferers? Every dollar, except the expense for the local campaign, goes to keep alive those who would otherwise die. The cost of national and state administration is provided by a few interested individuals, chief of whom is Cleveland H. Dodge, of New York. Your county chairman

gets nothing and wants nothing for his service. He is glad to contribute it.

C. V. DUNN, Co. Chairman.

Lohigh News: We are safe in saying that 90 per cent of the cuttings, shooting and murders committed in this county can be traced to in-

"Snake Oil" Relieves Thousands

Stops Pain Or Money Back

Surely when ten million people buy Miller's Antiseptic Oil (known as Snake Oil), on a positive guarantee of satisfaction or money back, and only 12 bottles returned, you can believe that this is the "World's Greatest Reliever of Aches and Pains."

After once trying Miller's Antiseptic Oil (known as Snake Oil), you will never want to be without it because it penetrates so quickly and brings such prompt relief for such ailments as rheumatism, lumbago, sprains, aching joints, la grippe, colds, influenza, etc. Mrs. Sarah Mitchell, Higgins, Mo., writes, "I send \$2.20 for 2 bottles of Miller's Antiseptic Oil (known as Snake Oil), please send by return mail as I am needing the oil." Mr. Henry Atwell, Center, Kentucky, writes "I have just tried a 60c bottle and got great relief." Thousands of letters such as these have been received. Get a 30c, 60c or \$1.00 bottle today from any drug store. Money back if not satisfied, at

GWIN & MAYS

ADA, OKLAHOMA

poisoning liquors. Last Sunday's accidental killing of an innocent little girl, is said by ones who seem to know, can be traced directly to intoxicating drinks. There could be a lesson drawn from this last terrible affair, but it seems almost useless to dwell upon such things in a country where booze vendors go unmolested, while shootings and killings are of frequent occurrence. The only relief in sight seems to be that our Government after January 1st, will take a hand in the enforcement of the new booze laws and all cases will be thrashed out in the Federal court at Muskogee.

Two or three pounds more milk in every cow's bag every day means a big extra profit at present milk prices.

This increase is possible by the use of Purina Cow Chow Feed, which costs only about a cent a cow more per day than the average ration.

The reason Purina Cow Chow Feed produces such heavy increase is that it contains 20% digestible protein (24% crude), the maximum amount a cow can assimilate and keep in the best condition.

Every ingredient used in Purina Cow Chow is a feed of recognized value. There is no cheap filler. Every pound yields more milk in the pail.

Try a ton and you will understand why dairymen insist on Purina Cow Chow.

Two Phones — Call 308

I was there to make a sketch of her. Luncheon was just over, and she was talking to a little knot of women. The first words I heard, as I slid quietly into a nearby seat, were "National Biscuit," recalling pleasantly my own tasty Uneeda Luncheon. I liked her, and talked and talked as she spoke and my pen and ears busy.

"Between the dark and daylight," she was quoting "there's always a bit of pause," and listening—for the children. Since they were babies, I've given that thought. First I had to think of the babies. Then, when they were old enough to toddle, I thought of the children. Now, when they are grown up, I think of the men and women.

The original, inherent goodness of Uneeda Biscuit is due to the superior materials and methods employed in the baking. The everlasting table-goodness of Uneeda Biscuit is due to security of the In-er-seal trade mark package.

NATIONAL BISCUIT COMPANY

"You see, even in the most ordinary life, there are moments when we are much like the children. They are most lovable and most tractable after they've had something to eat. National Biscuit is the child's friend. Our children's hour begins our children's hour with its tasty feast."

1,500 ARE READY TO GO TO MINING

STATE COUNCIL OF DEFENSE HAS VOLUNTEERS FROM ALL PARTS OF STATE READY TO MINE.

OKLAHOMA CITY, Dec. 2.—With approximately 1,500 men in the state ready to begin work in the mines, the first definite step toward starting is expected tonight when Governor Robertson will likely issue an order for transporting the men to the pits.

Pledges continue to pour into the headquarters of the state council of defense, which is in charge of recruiting the labor to work the mines. Volunteers have come from all parts of the state, the first to respond being men in the western counties, where no coal has been obtainable for several weeks.

Restrictions are Extended.
CHICAGO, Dec. 2.—Restrictions on the use of coal already put into effect by the regional coal committees where the pinch of necessity had been felt, today were extended throughout the nation, under an order of the federal fuel administrator. The most extensive shut down of industry in history was in prospect and domestic consumers were preparing to endure privation and discomfort as the strike of bituminous coal miners entered its second month.

Only in Kansas, where volunteers worked in the strip pits under protection of state and federal troops, and in the New River field of West Virginia, was there prospect today

of increased production. In Kansas seven pits were working and in West Virginia operators said normal production was in sight by the end of the week. Throughout the remainder of the country, however, miners apparently remained steadfast in their determination not to return to work under the 14 per cent increase ordered by the federal government and accepted to by the operators.

New Trouble in Wyoming.
In Wyoming new labor troubles threatened to decrease the small amount of coal being brought out. Except for brief shut downs at the beginning of the strike and twice since, the mines in that state generally had maintained operations. Members of the railroad brotherhoods in Kansas today were expected to act on a resolution adopted last night to request authority to refuse to handle coal mined by non-union workers.

Under the sweeping order of Fuel Administrator Garfield limiting delivery of fuel or power only to essential consumers in the first five classes of the war priority list, curtailment of production was in prospect in factories turning out boots and shoes, brass and bronze manufacturers, clothing, machinery, (except where specifically exempted); iron and steel; jewelry, marble and stone products, instruments, paper goods (newsprint excepted); rubber goods, cigars, wagons and carriages, wood manufacturers, sheet and metal products, leather goods, mattresses, paints and varnishes, photographic supplies and miscellaneous non-essentials.

Theaters to Close.
Theaters, motion picture shows and other places of amusement faced complete shut downs. Churches and schools also were included in that category, although efforts were being made to postpone closing schools as long as possible.

Bakeries, except those producing only bread, also fell under the ban, as did confectioners and certain plants. In some of those industries, however, an immediate shut down might be forestalled if the regional coal committee permitted them to operate until their present supply of fuel was exhausted.

VERSIGRAMS

UNSUNG HEROES

I like to see the statues rise as soon as some great hero dies, by all means praise them to the skies who thus deserve. But if they left the choice to me I'd nominate for bravery some chaps who had no history, but sure had nerve. It was a brave man who first lit a torch from some volcanic pit, or from the tree by lightning hit in ages dim. It was a hero Indian who first risked his life in a canoe or broke his neck on bridges new or learned to swim. If I had been the first to see the fire burn up some lightning-rod tree the place had soon been minus me and my alarm. I'd run away fast as I could, and missed the joys of well-cooked food, and never taught my kids that wood could keep them warm. I hold that that old boy was great who had the nerve to learn to skate; I don't care if he was an ape or had web wings. So like the Athens men of old let's praise the gods with names untold, the curious cave men and the bold who started things.

DADDY'S EVENING FAIRY TALE

OF MARY GRAMM BONNER

QUEER FISH.
"What are you?" asked a little fairy riding in her boat of foam.

"I'm a fish, I'm a fish," said the creature.

"Well, I guessed that much," said the little fairy. "I didn't think you were a bird or a wild animal."

"Didn't you?" asked the fish. "Well, you're bright, aren't you?"

"I'd like to be bright," said the fairy, "but I couldn't call myself bright just because I knew you were a fish. Now if I had known the sort of a fish you were, or you are, I would have been brighter."

"I am not sure that I know myself," said the fish.

"What?" asked the fairy. "You mean to tell me you don't know your own name?"

"I may, if I stop to think," said the fish. "But what does a name mean to me? Nothing. When I'm swimming along I don't care whether I know another fish by name or not. It doesn't make any difference when I wave my fin at him whether I say,

"Hello, or 'Hello, fish,' or 'Hello, Mr. Whale, or whether I call him something else entirely."

"Have you ever waved your fin at Mr. Whale?" asked the fairy.

"No," said the fish, "I haven't. Of course some day I might. Probably the great honor, however, would be too much for me. I couldn't stand the shock. I might fall headlong into the whale's mouth. So it is just as well, I suppose, that I don't meet Mr. Whale."

"Well, tell me something of yourself," said the fairy.

"I haven't much to tell you," said the fish. "I've heard that folks called me the frost fish. Maybe that's right, and maybe it isn't."

"You don't believe people?" asked the fairy.

"Sometimes, and sometimes I don't," said the fish. "They make mistakes. I don't blame them. They're not fishes. They don't know all about our lives. They can only tell by watching and seeing what some one of us has done, or perhaps what a lot of us have done."

"What are you supposed to do?" asked the fairy.

"I have no regular rule for anything," said the fish, "except I'm fond of this season of the year."

"Why?" asked the fairy.

"Why does anyone like this season of the year?" asked the fish.

"Well, some like it because it is clear and cool and some like it because it is such a beautiful time of the year with so many lovely colored leaves," said the fairy. "and there are

some who don't like it because it is the end of the year. For then they feel that time is passing."

"Well, it is, isn't it?" asked the fish.

"Of course," said the fairy.

"Then why do they object?" asked the fish.

"Oh, they hate to see time going on because they love everything so they think they might like it to stop and not go on for awhile."

"Will Time do that?" asked the fish.

"No," said the fairy.

"Not very obliging of Time, is it?" asked the fish.

"It's not Time's fault," said the fairy. "It's just the way things must be. And after all it is for the best, for it keeps creatures from wasting Time. But you haven't told me anything about yourself, fish."

"Well, all I know is that some folks call me the frost fish because I appear in the fall when I come to the top of the water and look at the shore all around. I'm a pretty whitish color, eh? I like the fall because it is crisp and cool, that is why I like it. But then folks call me a queer fish, a queer looking fish, so maybe my ideas are queer."

"That one isn't," said the fairy. "That one is all right, quite all right."

Why Billy Was Licked.

Mother—What's the matter, Billy?

Weeping Liddle—Teacher whipped me.

Mother—What for?

Weeping Liddle—Just for answering a question, and it was the right answer, too.

Mother—But I don't understand. What was the question?

Weeping Liddle—She asked who put the dead mouse and the box of worms in her desk.—London Tit-Bits.

KATY ENGINES TO BURN CRUDE OIL

GLOOMY COAL OUTLOOK CAUSES KATY OFFICIALS TO TURN TO FUEL OIL FOR ENGINES

MUSKOGEE, OKLA., Dec. 3.—Cutting off of the coal supply from the east would leave railroads running into Muskogee without fuel inside of a week, according to rail officials here.

"We have about a four-day supply of coal on hand, but more is coming in every day," said C. C. Blossom of the Katy Tuesday. "If the eastern roads become congested or the trains are held up by blizzards or other weather conditions, we won't be able to run over a week at the outside."

Even with the supply of coal shut off the Katy trains might continue limited service. A large proportion of the Texas locomotives of the Katy have been converted to burn oil, while engines on the Oklahoma, Missouri-Kansas runs are being converted at the rate of one a day, say officials.

"If the coal strike lasts long enough, we may have all the locomotives converted to burn oil," said a Katy official. "One of the engines converted last week at Parsons was run from Parsons to Denison—278 miles—on one tank of fuel oil at 58 cents a barrel. That's a lot cheaper than coal at present prices."

"I look to see all railroads in this section to be equipped with oil burners soon. It is the cheapest, cleanest and easiest to handle."

Other roads running into Muskogee have not yet begun to convert

their locomotives so as to burn fuel oil, it is said.

Domestic users, however, should have plenty of coal, say rail men. About eight or ten cars have arrived in Muskogee since the strike started and practically all is being distributed to the small consumer. Last winter's consumption of coal by Muskogee did not go over 40 cars, so rail officials are inclined to believe that there will be no actual suffering here from want of coal—unless the gas supply should become completely exhausted.

Continuation of the present cold spell with its drain on the gas supply might result in a serious situation, it is said but it is anticipated that the cold weather will not last very long.

One car of domestic coal was received Monday by the Frank Swift company and was distributed Tuesday in 500 pound lots.

Meeting of Canvassers

Those who are to put on the Every Member Canvass in the Christian Church next Sunday afternoon are asked to meet this evening at the church at 7:30. This will be an important meeting, and every canvasser should be present. What the church does next year depends on what the canvassers do next Sunday. The canvassers are requested to be present promptly on time as every moment will be needed for final preparation.

South China's Administrative City.

Canton is the chief Chinese administrative and commercial city of South China. It is situated inland from Hongkong, 95 miles by water and 112 miles by rail, and is located in the fertile Canton delta country, in which converge the West, North and East rivers. In foreign trade Canton ranks third among Chinese ports, being exceeded in volume by Shanghai and Dairen.

Crater Lake in Southwest Oregon is one of the deepest freshwater lakes in the world.

Keep The Egg Basket Full!

The feed elements that make whites of eggs are entirely different from those that make yolks. When hens aren't fed both the white and yolk making elements, they can't keep the egg basket full. The usual method of feeding mostly grain makes yolks but not enough whites to complete the eggs.

Missouri Experiment Station tests prove that 100 lbs. of wheat, corn, oats, barley and kafir corn make (above bodily maintenance) an average of 224 yolks to 154 whites. Based on data from the same experiments, Purina formulas produce, (above bodily maintenance), as follows:—

| | Yolks | Whites |
|------------------------|--------|--------|
| Purina Scratch Feed | 247.49 | 142.11 |
| Purina Chicken Chowder | 182.05 | 282.55 |
| Combined Ration | 429.54 | 424.66 |

These Purina feeds not only make a practically equal number of whites and yolks but more of both than ordinary feeds.

Note that Purina Chicken Chowder contains the necessary white-forming elements to balance up the yolk-making grain ration. That's why it makes hens lay so heavily instead of the yolks being absorbed by the hen's system. Purina Chicken Chowder makes the whites to complete the eggs and they are laid. Thus we can absolutely guarantee

more eggs or money back

on Purina Chicken Chowder if fed with Purina Scratch Feed as directed. You take no risk.

A BLACK-DRAUGHT FAMILY

An Interesting Record

A Letter From the Mother of the Family

Winchester, Tenn., September 17, 1919.

I am the mother of seven boys and seven girls, all about grown. We, I suppose, are one of the healthiest families in the South. . . . We are a large family; you will see very few families, mother and father, with fourteen grown children, who can say that their health is better than ours, and we have used for our family medicine THEDFORD'S BLACK-DRAUGHT, and very little of anything else.

BLACK-DRAUGHT is the best liver tonic I have ever seen. We have used it for headache, torpid liver and constipation, and it is just as recommended.

MRS. PEGGIE ROSE.

DEPARTMENT STORE

Something of an Imputation.
A well-known surgeon was performing an operation on a patient when a fire started at a warehouse across the road, illuminating the whole operating theater. Having finished, the surgeon turned to the nurse and said dryly: "I say, nurse, I notice the patient is coming to. I think you had better draw the blinds. I don't want him to think the operation hasn't been a success!"

Exempted for Reason.
When parliament of the commonwealth of Australia enacted a law some years ago prohibiting the employment of Asiatic and native island laborers in that country, the crews, divers and other workers in the pearl industry at Broome were Malays and Japanese. More than 1,500 Japanese were employed in the pearl-fishing fleets. For a time it was feared that the new law would destroy the industry, but no attempt was made to enforce the law.

It will pay you to watch the Want Ad columns of the News.

DOCTORS REPORT WILSON BETTER

APPETITE DECIDEDLY BETTER AND HE IS SLEEPING WELL, SAYS LATEST BULLETIN ISSUED.

WASHINGTON, Oct. 8.—President Wilson's condition improved again yesterday and his appetite, the failure of which has been one of the serious drawbacks to his recovery, showed a decided change toward normal.

So far had he progressed that his two married daughters, Mrs. William G. McAdoo of New York and Mrs. Frances B. Sayre of Cambridge, Mass., who came to his bedside several days ago, returned to their homes after consultation with the President's physician.

In their day bulletin the physicians said:

"The President has had a comfortable day and is slightly improved." Dr. Grayson and the other physicians showed a decided inclination to guard against overoptimism, however, as they believed another setback is still within the range of possibility. They continued Mr. Wilson's confinement to bed and kept official business away from him.

Messages of solicitude continued to pour into the White House today from all parts of the world.

WASHINGTON, Oct. 8.—President Wilson was visibly stronger today than at any time since his became ill nearly two weeks ago. A bulletin was issued late today by the attending physicians which was as follows:

WHITE HOUSE, 11:45: The President continues to improve slowly. He is stronger today than at any time during his illness and we consider his condition good. This bulletin was signed by Grayson and all of the attending physicians.

To the Public.
I have been employed by B. B. Howard for the past three and a half years. I am now opening a shop, first door east of Harris Hotel. I will soon be prepared to make anything that can be made in a tin shop. Will repair radiators. I will do good, honest work at a reasonable price. It pays to have your work done right and costs no more. —Jim Emerson. 10-8-2nd-2tw

ENGLAND WANTS TELEPHONES AND POSTOFFICES SEPARATE

By the Associated Press

LONDON, Sept. 15.—(Correspondence of The Associated Press)—Several London newspapers are conducting a campaign to bring about the separation of England's telephone service from post office department control. These papers cite the highly efficient telephone systems of the United States as an example of what might be accomplished in England. In one year, one large American telephone company installed more new phones than have been added to London's system in forty years, one of these papers declares.

A telephone is a prized possession in what relatively few London homes have them. A resident of the British capital cannot have a telephone simply by ordering it. Lack of equipment and personnel has made expansion of the city's telephone service in arrears of requirements. A person holding a telephone contract and intending to leave the city usually advertises in a newspaper the fact and invites offers of premiums as he has the privilege of subletting his contract. Contracts have been transferred for premiums from \$200 to \$500.

Where He Got the Name

The first bulldog appears to have been bred from the English mastiff, and by process of systematic selection in breeding a smaller and more active dog than the mastiff was evolved. The smaller dog was found to be better suited for sport than the heavier and slower mastiff. The bull baiting dog, without a doubt, required an inordinant amount of gameness.

Old Tradition Exploded.

Again that old stuff about "ants in these days" has been rudely punched out by the museum visitors inspecting suits of armor worn by doughty knights in the "fifteens." One of our regular doughboys of average proportions cannot get his arms into the leg pieces, and the average schoolboy of the present day would find the "suit" uncomfortably tight.—Florida Times-Union.

Japanese Hairdressers.

The professional coiffeur for men is a much older occupation in Japan than that for women. There are records as far back as the thirteenth century of male hairdressers for men; for the samurai especially were very particular as to how the hair was done up, though as a profession the coiffeur was of somewhat later growth.

The Telltale Thumb.

It is a well-known fact among nerve specialists that by an examination of the thumb they can tell if the patient is affected, or likely to be affected, by paralysis or not, as the thumb will indicate this a long time before there is any trace of the disease in any other part of the system.

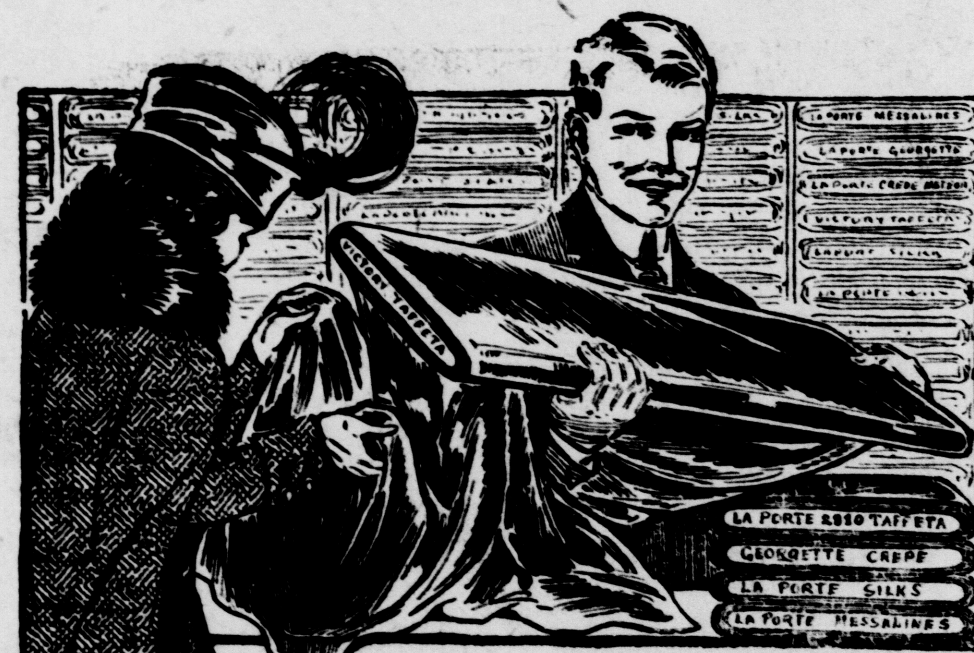

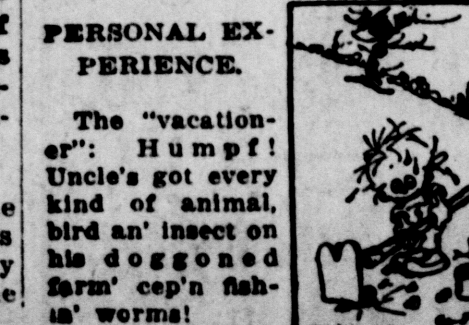

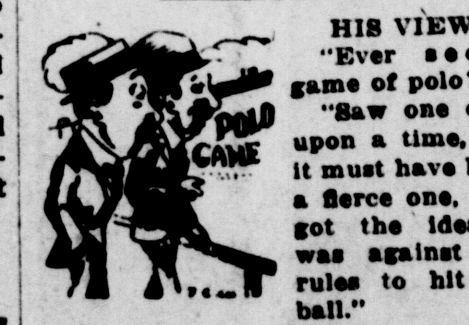

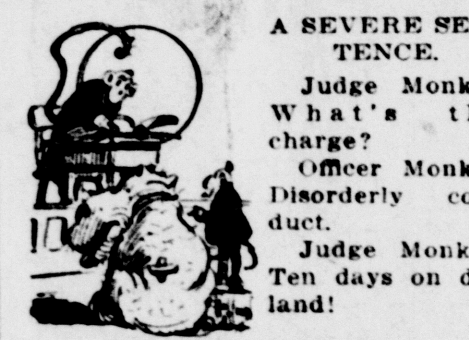

Cause for Rejoicing.

Leonard was walking with his nurse and met a friend of his mother, who proceeded to engage him in conversation in a most effusive and enlivened manner. On parting with her, Leonard was silent for a long time, and then said with a gentle sigh of thankfulness: "I am so glad, Sarah, that I've got a nice, gloomy mother."

Norway Must Import Sweetstuffs.

Norway produces no sugar within its own borders and the sweet sirups produced from vegetable sources are of slight importance, so that country is in a position of almost absolute dependence on imports for its sweetening materials.

"They shall not pass" may be the slogan for the republican congress in its opposition to all the bills they promised and all the measures the president recommended.

White Man from Roff is Charged With a Felony

One Sallee of Roff was brought to Ada today by Constable Bunyard and locked in that popular resort known as the county jail. The charge against Sallee is that on the night of December 1 (otherwise Monday night) the defendant did wilfully and feloniously break into the home of one Janie Minner with the intention of committing an assault upon the said Janie Minner. That the said Janie Minner is a woman and not the wife of the said Sallee and is alleged to be a human being. It is said that the woman is a negress and broke all records in making her getaway when the white man, Sallee, broke into her home. Sallee is to have a preliminary hearing before Justice Brown this afternoon.

RESOLUTION WOULD BREAK WITH MEXICO

WASHINGTON, Dec. 3.—A resolution requesting President Wilson to sever diplomatic relations with Mexico was introduced today by Senator Fall, republican, of New Mexico, and member of the senate committee charged with investigating the Mexican situation. Explaining his resolution which also requested the President to withdraw all recognition with Carranza, Senator Fall declared it was based on evidence which would "astound the world" when produced. The resolution was referred to the foreign relations committee. "I charge," said Senator Fall, "that the Mexico embassy, the Mexico consul general in New York and the consul general in San Francisco has been engaged secretly in the distribution of Bolshevism propaganda and that this has been done with the knowledge and consent of Carranza."

Comparatively New and Fashionable Garments at 1-3 off

How fortunate, if you have waited! Here are tailored suits of impeccable fashion, of that well-groomed look which is the unmistakable hall-mark of expert and faultless tailoring, of fabrics that are the very apple of the mode's eye, at deep, precipitate reductions. The savings come at a day when savings are needed. They are timely, as pat as the hero in the "movies."

And here are coats of wonderful woolsens. Were ever fabrics so rich, so luxurious as now? Deep, thick Bolivias, Velours, Silvertones and the like. These, too, are at special rates, the fruits of fortunate purchases, offering savings large and round. Long, enveloping models, many of them belted and high-collared; all of them tailored in the pink of perfection.

Every woman who requires a dress should come at once. The shrewd woman wants the first choice; she comes early to find not only style, but her size. The one you looked at before may still be here.

THE OTTOMAN EMPIRE HOLDS DOWN WAR DEBT

By the Associated Press
CONSTANTINOPLE, Dec. 3.—The war debt of the Ottoman Empire is said by experts to have increased less than that of any other nation. Her bonded indebtedness was increased by only one new loan of about \$80,000,000, and, adding to this other increases in obligations such as home military requisitions

and advances from Austria and Germany, her war expenses ran to only \$600,000,000. Consequently, allowing for various offsets, her postwar indebtedness amounts to about \$1,000,300,000.

This would make it appear that Turkey "ran the war on a shoe string," financially, as compared to Great Britain with her \$40,000,000,000 war debt, or France with \$30,000,000,000, and the United States with \$25,000,000,000 and Italy with possibly \$15,000,000,000. It will be recalled that on paper the Ottoman Empire mobilized nearly 4,000,000 men, yet she escaped with something like the war expenses of a country like little Rumania or Bulgaria.

The record of the Turkish war indebtedness is unique. The Empire met war costs by requisitions and by printing in Germany 155,000,000 Turkish paper pounds, or normally about \$680,000,000 but this, according to the experts, cannot be considered a government liability.

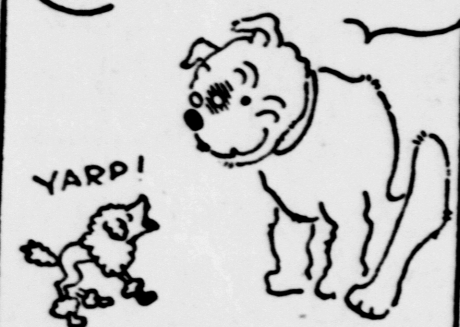

It is not a financial burden as it bears no interest, and also the proper administrative body of the Peace Conference can at will have it cancelled.

Turkey's paper money, it is claimed, has not depreciated as much as that of her Allies. Counterfeiters do not seem to have operated here extensively due to the lack of Bolshevism and good printing presses. In Mesopotamia Turkish paper money is refused since the British occupation, which the Turks do not consider fair since the paper money was issued for the whole of the Ottoman Empire which made war as a whole.

The amount of Turkey's war reparation is yet to be determined.

State Council Calls For Men To Mine Coal

The state council of defense has issued a call for volunteers to work in the coal mines of Oklahoma. The following letter received from Chairman Whitehurst gives the plan of the council for operating the mines.

Mr. Luther Harrison,
Ada, Oklahoma,
Dear Sir:—

Last Friday we sent telegrams to all the chairmen of the west side, asking how many units of ten men they would furnish to mine coal, more especially the strip mines.

We are getting many responses and many of the western counties are offering from fifty to two hundred and fifty men to the county. The need and necessity of the west side is so much greater than that of the east side, which has considerable timber.

The plan is to organize units of

ten men, selecting one of their number as a lieutenant to have charge of the unit, then organizing into companies of five units, selecting one of their number as a captain, who will have more or less supervision at the mines over these men. The governor and the state council of defense are not interested in assisting the operators or helping to break the strike. We are interested in getting coal to relieve and prevent suffering.

Will your county furnish as many as fifty to one hundred men? I will be very glad to have a prompt answer, which will enable us to be getting coal by the latter part of the week.

The plan is first, to distribute a reasonable amount of this coal to the people. Necessarily, we will have to keep the railroads running, or we could not transport the coal. I will ask you to call upon your citizens, public utilities, etc., to reduce the use of fuel to the lowest minimum.

Yours very truly,
J. A. Whitehurst,
Chairman State Council.

First showing of new spring suits.

\$15, \$18, \$20 and \$25

We are closing out our entire line of Ladies' Fall Suits at special prices—

\$25, \$39.50 and \$55

STEVENS--WILSON Co.

December 8

IS THE DATE---FOR WHAT?

For the climax of the campaign to relieve our suffering brothers in the East.

An Ada man in yesterday's News complained because he and others had to go to work yesterday morning with a cold body and a hungry stomach. His complaint was just. What of those thousands and hundreds of thousands of destitute orphans in far-off Armenia who always have cold bodies, and no breakfast at all—or, if any, it consists of grass and roots, or grains picked out of unspeakable filth? While we look forward to a bountiful, warm Christmas, what will the people of Pontotoc County do for these wretched sufferers on December 8? J. A. Smith of the Guaranty State Bank is county treasurer.

C. V. DUNN, County Chairman.

Playfellows for Jack Frost

When the first snow flies, children greet the big, fluttering flakes as if they were playfellows—banished and returned. The snow comes swarming down and the youngsters send up shouts of joy, meeting it with the same zest that awaits the first robin and the earliest flowers. They love the changing year in which every month has a new charm for them, and it is a pity that this frame of mind should ever change. They take all kinds of weather as a matter of course and, if dressed to be comfortable, will face rain or shine with equal cheerfulness.

Considering the advantages of keeping them in the open air for as many hours of the twenty-four as possible, the matter of winter clothes is to be considered with this idea in mind. No one doubts the tonic of the cold—it is required to produce hardy men and women—so the important thing is to dress the children to be comfortable while they are out of doors in freezing weather. Headwear, footwear and underthings must all be reckoned with, and, above all, the coat that forms the outer wall of the citadel when cold attacks.

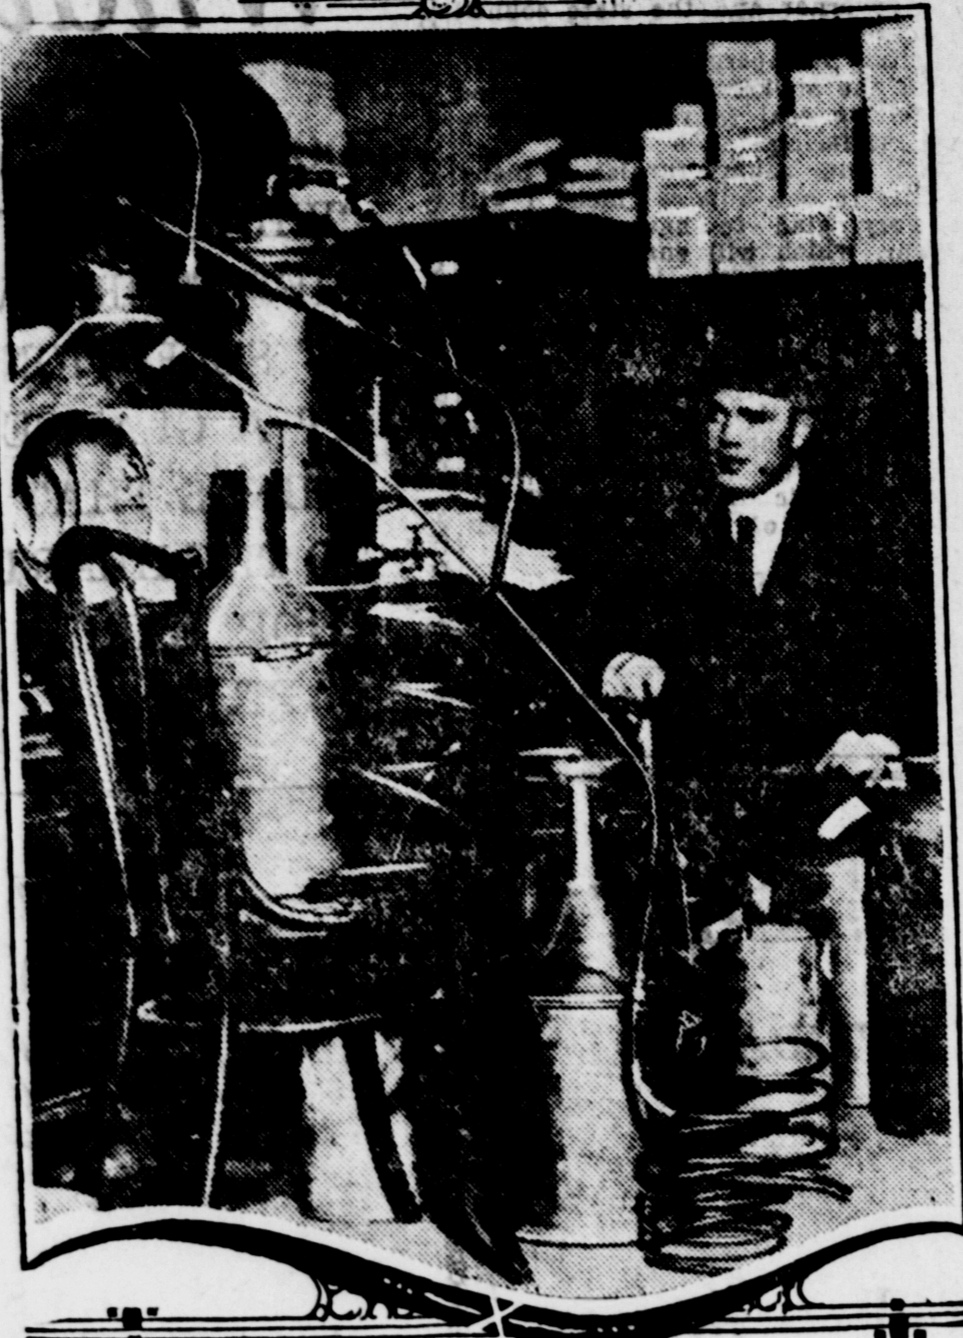

There is nothing quite equal to natural skins to insure comfort in the coldest climates, but they are not needed elsewhere. Muskrat, squirrel, rabbit and other plentiful pelts are used for children's coats, but they are out of reach of the mother who believes in being conservative in expenditures for children. Even the low-

ly and plentiful rabbit's generous contribution of pelts hasn't brought down the high cost of fur coats; a little coat of rabbit skin sells for more than a hundred dollars. Fur fabrics and especially wool furs, make very warm coats and none of these textile furs are woven in patterns especially suited to children's wear. But the bulk of coats for coldest weather are made of heavy woolen materials and lined with close-woven but lighter wool fabrics or with other substantial linings. Chinchilla, astrachan and rough-surfaced woollens are warm and durable and corduroy is an attractive fabric that has the same virtues. The coat shown at the right of the two pictured is the type liked for everyday wear.

The little coat at the left is a dressy affair of velveteen made with blouse and skirt and has a wide cape collar and band cuffs of beaver plush. It is a handsome garment and the fabrics are sturdy and warm. Labor is the most expensive element in coats and a coat of this kind made at home will cost about half the price the shops must get for it. The heavy cloths for everyday wear are more difficult for the amateur to work with and it is doubtful that any saving worth while can be gained by attempting them at home.

Julia Bottomly

SOME SAD NEWS FOR WOULD-BE DISTILLERS; MANUFACTURING PLANTS ARE RAIDED

Stills captured in one of the plants.

Chief Deputy Inspector Littlehales of the Philadelphia district of the internal revenue department recently led a raid on plants of two manufacturers of whiskey stills and as a

result of the raid many orders for the stills for home use will not be filled. In the two plants raided in Philadelphia thirty-three stills and six worms were found and confiscated.

The State Press

Cushing News: Governor Robertson may have been reading about Governor Coolidge of Massachusetts. Anyway he is doing the right thing.

Ardmoreite: The one recently closed was indeed an extraordinary session of congress. It was extraordinary both in point of its opportunities and its failures.

Shawnee News: Being firmly convinced that Ardmore is a part of Texas anyway, Bert Love of the Ardmoreite went down to the Texas editors' meeting at Dallas yesterday.

Ardmoreite: Republican enemies of the treaty in the United States senate will learn during the next campaign that by prolonging the war they have confronted their party's candidates with a battle for life.

Cushing News: Gore has predicted his re-election to the Senate by the "largest majority he ever received," though the former kaiser has lost his political influence in this country.

Coalgate Record Register: Any man who thinks he can get along without his community is mistaken. There is something wrong with his mental make-up. The cancer of narrow selfishness probably

Coalgate Record Register: Our city and county now and in the past has been pestered with almost every kind of varmint on earth but if we have any I. W. Ws. they have never come out of their hole.

Shawnee News: And the other fellow has nothing on the Morning News, for in its mail Sunday morning was a letter signed by Bill Carlisle or someone for him, with his customary jocular remarks about the burg and the police.

Durant News: A wealthy Easterner started in to learn flying a few weeks ago. It seems that the credit of his only daughter's husband became quickly and unaccountably good, and when the old man heard of it, he thought a little—and quit flying.

Tishomingo Capital Democrat: Last year was the year we expected so much from this year, and of course we are now figuring on accomplishing an awful lot next year, but it is best to be satisfied if you manage to get ahead a little bit each year for that is about all the average can expect. If you make up your mind to climb to the heights instead of seeking to jump to them you will get there faster.

GLASS EYES AND WOODEN FEET NO BAR IN GOTHAM

By the Associated Press
New York, Nov. 29.—Two war veterans, one of whom brought back from France a glass eye and the other a wooden foot, were appointed patrolmen on the New York police force. A statement issued by Morris Cukor, president of the municipal civil service commission, said the men were appointed in line with a policy of "extending the greatest possible latitude consistent with a the public welfare to those who were wounded or maimed while offering their lives for the honor of the flag and the preservation of American institutions."

A. AND M. CATTLE WIN AT BIG SHOW IN KANSAS CITY

As has been freely predicted by competent judges, A. and M. cattle—Shorthorns, Herefords and Aberdeen Angus—continued the splendid record made at the Oklahoma and Texas state fairs last fall by winning premier honors at the great American Royal at Kansas City, November 15-22. The splendid success achieved at this show strengthened the belief that they will bring home additional honors from the International Livestock Exposition, to be held at Chicago, December 1-8. The winnings at Kansas City include seven first prizes and one

grand championship, White Sox, the junior yearling steer, repeating the records made at the state fairs; second on steer herd (Shorthorn), and first on the Aberdeen Angus steer herd.

The following were the first and second prizes won:
Shorthorns: Junior yearling steer, White Sox, first; senior steer calf, White Hope, first; steer calf, Roan Model, first; senior yearling steer, Regal, second; steer herd, second.
Herefords: Prime Lord, junior yearling steer, first; Quincy, senior steer, third; steer herd, fourth.
Aberdeen Angus: Junior yearling steer, Oklahoma Heatherson, first; junior steer calf, Heatherson's Choice, first; senior yearling steer, General Bliss, second; steer herd, first.
This is the second consecutive year the College has won first on Angus yearling, junior calf and

steer herd. The total cash premiums amounted to \$390.00.

QUICK RELIEF FROM CONSTIPATION

Get Dr. Edwards' Olive Tablets
That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the substitute for calomel. No gripping results from these pleasant little tablets. They cause the liver and bowels to act normally. They never force them to unnatural action. Dr. Edwards' Olive Tablets are a soothing, healing, vegetable compound mixed with olive oil.
If you have a bad taste, bad breath, feel dull, tired, are constipated or bilious, you'll find quick and sure results from Dr. Edwards' little Olive Tablets at bedtime. 10c and 25c a box.

Ask—

Ask any talking machine dealer if his machine reproduces the voice of an artist so perfectly that it cannot be distinguished from the original. If he says yes, ask him how he can tell—ask him if his talking machine is tested against the artists who make records for it.

Then ask the dealer who handles

The NEW EDISON

"The Phonograph with a Soul"

the same question and he will inform you that the New Edison has been tested in direct comparison with noted Edison artists—three thousand times before more than two million music lovers, none of whom could tell the artist from the New Edison.

Hear at our store the phonograph that has met these tests.

C. E. CHENOWETH FEED SPECIALIST

Mr. C. E. Chenoweth, representing the Ralston Purina Company, America's greatest producer of feed for all kinds of animals and poultry, is with us this week to talk feed to the people of Pontotoc County.

Mr. Chenoweth is a specialist in feeds. He has studied the matter from every angle and can give scientific discussions and first-hand information on anything from the production of eggs to the rebuilding of run-down dairy and beef cattle.

Every friend and acquaintance of this store is invited to call this week and meet Mr. Chenoweth and let him tell you of the wonderful values of Purina Feed.

If there is a person in the city who is unavoidably detained from calling, we kindly ask that you notify us over the telephone, and Mr. Chenoweth, in company with a representative of this store, will call at your residence and give you exactly the information you need to solve your poultry or dairy problems.

WOULD LIKE SECRET FOR LOOKING WELL

"Two weeks ago I weighed 96 lbs. Now I weigh 105 lbs. and feel perfectly well. Anyone I see suffering I tell them of what Mayr's Wonderful Remedy has done for me. They all want to know what makes me look so well. Your medicine has also been a real life-saver for my mother. I cannot recommend it too highly for stomach trouble." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.

AMAZON VALLEY IS ATTRACTING WORLD

(Continued from Page One.)

the greatest commercial value, it is surprising how few first class saw mills there are in the region and there are none which might be said to compare in efficiency with those of our own northwest.

Owing to the maze of waterways which cover the entire surface of the valley, there never can be any large railroads paralleling the main Amazon River and all railroads will therefore be constructed to act as "feeders" only to the main river and its principal affluents, opening up the interior back of the river banks. Concessions have recently been granted by the state congress for various short lines, one of which is intended to link the Amazon from the town of Macapa near its mouth, with the Oyapock River which separates Brazil from French Guiana. This line will open up vast areas suitable for cattle raising, also gold bearing lands which were abandoned when the French ceded the northern part of the state of Para to Brazil twenty years ago.

Another line is to be constructed

between the town of Obidos, 600 miles up river, and Dutch Guiana. A line is under construction on the bank of the Tocantins River from the first rapids, at Alcobaca, to the navigable water of the upper river, and about ninety miles of the lower end is now practically completed. Other railroad concessions are under discussion in the chamber of deputies as also sundry motor roads from the banks of some of the rivers to interior centres of population.

It is rumored that the Braganza railroad is about to be sold by the state of Parato and English syndicate which is said to be backed by the banking firm of Rothschild & Co. The charter of this railroad provides for a line from the city of Para toward the Atlantic and parallel to the coast in the states of Para and Maranhao. About 140 miles have been completed and in operation for several years through a highly productive agricultural district, but the recent discovery of valuable ores and mineral deposits on the projected line into Maranhao probably has been the occasion of the outside interest. Corn, beans, rice, mandioca, bananas and many other fruits, potatoes, vegetables of all kinds are new being raised in the Braganza section for the local market, and during the past year or two the production of cotton, tobacco, sugarcane and cacao has been undertaken on an extensive scale.

An announcement appeared in the local newspapers recently that the

Johnson line is about to establish a steamer service between Swedish ports and the Amazon, touching at Spanish and Portuguese ports.

Local Americans are outspoken in their regret that there seems to be no American participation in this development work; they claim there is no region on earth offering greater opportunities.

Ada Athletic Association is Now Organized

A majority of the stockholders of the newly proposed Ada Athletic Association, represented in person and by proxy, assembled in the lobby of the Ada News office at eight

o'clock last evening, perfected the organization of the stock company, elected a board of directors and appointed all necessary committees.

Leslie E. Prince was chosen as temporary chairman of the meeting and on being informed that the charter had been received immediately proceeded to permanent organization of the association. It was decided that the association should have a board of directors of fifteen members. A nominating committee was named to place the board in nomination and the following fifteen stockholders were placed in nomination and unanimously elected one at a time, the stock holders taking the utmost care to select members who were enthusiastic and who would be able to attend board meetings regularly:

W. J. Coffman, Sherwood Hill, J. M. Coleman, Marvin Brown, Joe Cole, H. W. Wells, M. A. Waits, Paul Alderson, A. M. Gregg, J. R. Kitchell, M. O. Matthews, B. C.

King, Louie Keeler, J. R. Couch, E. S. Haraway.

A majority of the board of directors being present they then met and elected W. J. Coffman president of the organization, J. M. Coleman Vice President and Leslie E. Prince, Secretary. Marvin Brown, W. D. Little, B. C. King, Chas. Orr and J. M. Coleman were selected as a committee to draft a constitution and by-laws for the association.

The board of directors will immediately get busy on the selection of a site and the erection of the grandstand and other necessary buildings. It is the intention of the board to push the work and make an effort to get some of the league teams down here for spring training.

FEED SPECIALIST AT STANFIELD'S GROCERY
C. E. Chenoweth, representing the Ralston Purina Company, is in the city this week, under the auspices

of Stanfield's Grocery and Market, and all who are interested in the matter of the right kind of feed for
